

Interest bonuses to help increase the accumulation potential of your policy

Allianz Life Pro+ AdvantageSM Fixed Index Universal Life Insurance Policy offers you death benefit protection plus the potential to build accumulation value through fixed or indexed interest. And that's not all.

TO HELP ACCELERATE YOUR ACCUMULATION POTENTIAL, WE OFFER A VARIETY OF BONUS OPTIONS, OR AN OPTION WITHOUT A BONUS:

	Standard	Classic	Bonused	Select
Bonus details	No bonus	0.90% flat rate ¹	15% multiplier	40% multiplier
How it works	n/a	Adds a consistent bonus rate to the policy's annual accumulation value	Multiplies any annual indexed interest by 15%	Multiplies any annual indexed interest by 40%
Appropriate for clients	Who are willing to forego the potential for a bonus in favor of higher caps and participation rates, which may result in the potential for higher indexed interest to be received.	Who may want a conservative approach and a guaranteed interest credit. Even if you receive a zero credit in a year, you still get a 0.90% bonus for the year.	Who are looking for a moderate choice with bonus potential but no additional charges associated with the bonus. You have confidence in the market, anticipate a good index return, and don't want to take the risk of any additional charges associated with a bonus.	Who are willing to pay an additional charge in return for the potential to receive a higher bonus and greater accumulation potential.
Cost to client	n/a	n/a	n/a	1% annual asset charge

Bonuses are credited on annual basis on the policy anniversary. The cap and/or participation rate will vary based on whether the index allocations selected offer a bonus or not.

¹ Includes an allocation restriction, meaning you may not be able to allocate 100% of your accumulation value, if the fixed account goes below 1%. Must be accompanied by the appropriate Life Pro+ Advantage consumer brochure.

Bonused products may include higher surrender charges, longer surrender periods, lower caps, or other restrictions that are not included in similar products that don't offer a bonus. The index allocations that offer the interest bonus will generally have lower caps and participation rates. Not all bonuses guarantee that a policy will be credited with an interest bonus every year as some are based on the growth of an index.

Although an external market index may affect your interest credited, your policy does not directly participate in any stock or equity or bond investments. You are not buying shares in any stock or index.

Product and feature availability may vary by state and broker/dealer.

Determining which bonus option to choose:

THESE QUESTIONS MAY HELP YOU SELECT AN OPTION THAT COULD BE APPROPRIATE FOR YOU:

1

Is your goal to ALWAYS avoid a 0% interest credit or do you see the market/index returning below 6% during your crediting period?

If yes, consider: CLASSIC: 0.90% GUARANTEED FLAT RATE BONUS

2

Do you have confidence that the market/index could return above 6% during your crediting period?

If yes, consider:

- BONUSED: 15% MULTIPLIER BONUS, or
- SELECT: 40% MULTIPLIER BONUS WITH A 1% ANNUAL ASSET CHARGE

3

Are you willing to pay an extra charge and take extra risk for more accumulation potential?

If yes, consider: SELECT: 40% MULTIPLIER BONUS WITH A 1% ANNUAL ASSET CHARGE

4

Are you looking for simplicity, with no added bonus, but potential higher caps and participation rates?

If yes, consider: STANDARD: NO BONUS
