

# Choosing how hard your money works for you

## For added growth potential, magnify interest credit increases with the AssetShield Performance Rate Rider.

This option provides an increased rate on any of the participation rate, cap or replacement rate crediting strategies. This option is available on one or more of the indexed strategies, so that clients can adjust and diversify their exposure. The rider fee is locked-in for the surrender charge schedule and will be deducted on the last day of each index term. Each year clients have the option to elect the strategies this rider is applied to.
