Path to retirement: the traditional has become the uncommon

For generations, most people worked lengthy tenures with a few employers and then left the workforce directly when they were ready to retire. Today, shifting career paths are much more common and transitioning directly from full-time employment to retirement is increasingly rare.

Retirement income: diversified nest egg

No matter the route to retirement, most estimates suggest you will need between 60% and 80% of your working income to maintain your lifestyle through retirement. Typically, Social Security replaces approximately 40% of pre-retirement income.¹ A three source retirement income structure (Social Security, Defined Benefit and Defined Contribution) is widely considered ideal for retirement security, but only 7% of older Americans live this way.²

Building assets for the long-term

As the responsibility of building a nest egg has shifted to the individual, more are taking an active role in long-term planning to secure the financial stability and flexibility that multiple income sources can provide.

The closer you get to retirement, the fewer opportunities you may have to grow the assets you've earned for retirement years, hence why it's all the more important to protect your money as it grows.

A fixed index annuity is a contract that can help protect hard-earned dollars, while providing safe growth potential. It is a contract backed by the financial strength and claims paying ability of the issuing company. This guarantees contract owners a retirement vehicle designed for the types of benefits people need as they near retirement.

By establishing a plan for a portion of retirement assets with a fixed index annuity, you can provide yourself principal protection from market downturns and allow tax-deferred portfolio growth*, while having your choice of diversified accumulation strategies.

AssetShield Fixed Index Annuity

AssetShield Fixed Index Annuity

The AssetShield fixed index annuity is designed to help you get the most work out of every dollar you place toward your future.

Asset Growth Potential

American Equity's flagship accumulation fixed index annuity offers a wide selection of crediting strategies linked to index performance, so you can choose to allocate to strategies that align with your wide variety of goals.

Asset Control

In addition, to having your choice of indices and strategies, you also have the option to purchase higher rates on select crediting strategies with a Performance Rate Rider. All the while, your money is able to grow tax-deferred for faster growth potential and increased control on the impact taxes have on your portfolio.

Asset Protection

Your principal is protected from market volatility, and you will never lose any of your initial premium due to a decrease in an underlying index. This allows you to build and shield your assets for the long-term.

Asset Access

AssetShield contract owners have multiple liquidity options to access their contract value as their annuity accumulates. This includes free withdrawals for up to 10% of the contract value annually. If withdrawals exceed the free withdrawal amount, during the surrender charge period a deduction will be taken out according to the surrender charge schedule.

Choosing your growth potential

American Equity utilizes indices managed by other financial institutions and industry benchmark index options like the S&P 500 to provide a wide selection of diversified exposure to multi-asset and equity classes.

Each index was selected for a unique value that can also work in tandem with the other indices. As different markets react to different factors, the option to allocate your money to multiple crediting methods can help you pursue your accumulation goals, lock in potential index-linked interest and manage volatility.

Index choices

SG Global Sentiment Index (Ticker: SGIXSENT Index): This multi-asset class index assesses market sentiments to determine whether a market is in a growth, intermediate or shrinking phase. Each phase is associated with an allocation across a global and diverse asset base, including equities, bonds and commodities in domestic, European and Asian markets. Societe Generale is one of the largest European financial services groups. It combines financial solidity with a strategy of sustainable growth and employs 138,000 employees in 62 countries, serving more than 29 million clients globally. Possible interest credits for money allocated to an index-linked crediting strategy are based upon performance of the specific index; however, fixed index annuities are not an investment, but an insurance product, and do not directly invest in the stock market or the index itself.

Asset Control Options

Performance Rate Rider

The Performance Rate Rider allows for added control on your growth strategy by purchasing an increased rate on any of the participation, cap or replacement crediting strategies. This option is available on multiple crediting strategy options. The rider fee is locked in at purchase so there are no surprises, and it can be removed upon your written request.

The fixed index annuity in this hypothetical example uses the annual point to point index method based on changes in the S&P 500® index to calculate the indexed rate for each term. Indexed interest is credited only on amounts held for the entire term. This example assumes no money is withdrawn from the annuity. Early withdrawal charges will apply if money is withdrawn during the early withdrawal charge period. Rider fee deduction occurs on the last day of the term based on contract value on the first day of the term.

Carolyn's Retirement Strategy

Carolyn is in her mid-50s. She is married with a daughter who is leaving for college soon. As she and her husband enter this new phase of their life, they are looking for opportunities to shore up their assets as they look to adjust their financial focus, as day-to-day demands lessen and the urgency for year over year growth increases. While both Carolyn and her husband have retirement accounts, their overall long-term finances have taken backseat to other priorities. Now they are excited to start putting their money to work as they look at life after work.

They begin their retirement accumulation journey by meeting with a financial professional. Based on their accumulation goals and asset protection needs, their financial professional suggests the AssetShield fixed index annuity as an option for protected long-term growth.

To show how the AssetShield provides a variety of accumulation opportunities based on index increases, the financial professional uses historical market data to demonstrate the hypothetical performance of an annual point to point crediting strategy for each volatility-controlled index option.

Using these demonstrations, Carolyn and her husband can begin mapping out their retirement accumulation strategy utilizing the crediting strategies linked to different index options available on the AssetShield fixed index annuity.

ERISA: You understand that (i) neither Credit Suisse nor any of its affiliates has or exercises investment discretion with respect to any assets on behalf of any employee benefit plans or individual retirement accounts (collectively, “Plans”) that may be involved with the purchase, holding, or redemption of a security, (ii) Credit Suisse is not undertaking to provide impartial investment advice or give advice in a fiduciary capacity on behalf of such Plans within the meaning of the U.S. Department of Labor’s final regulation defining “investment advice” for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and (iii) the information or communication provided herein or otherwise to the Plans or a fiduciary on behalf of any of the Plans is intended to be, and should be construed as, general information, and it does not and will not take into account your legal, regulatory, tax, business, investment, financial, accounting or other needs or priorities with respect to any Plans.

The SG Global Sentiment Index (the “Index”) is the exclusive property of SG Americas Securities, LLC (SG Americas Securities, LLC, together with its affiliates, “Société Générale”). Société Générale has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC (“S&P”)) to maintain and calculate the Index. “SG Americas Securities, LLC”, “SGAS”, “Société Générale”, “SG”, “Société Générale Indices”, “SGI”, and “SG Global Sentiment Index” (collectively, the “Société Générale Marks”) are trademarks or service marks of Société Générale. Société Générale has licensed use of the Société Générale Marks to American Equity Investment Life Insurance Company (“American Equity”) for use in a fixed indexed annuity offered by American Equity (the “Fixed Indexed Annuity”). Société Générale’s sole contractual relationship with American Equity is to license the Index and the Société Générale Marks to American Equity. None of Société Générale, S&P, or other third party licensor (collectively, the “Index Parties”) to Société Générale is acting, or has been authorized to act, as an agent of American Equity or has in any way sponsored, promoted, solicited, negotiated, endorsed, offered, sold, issued, supported, structured or priced any Fixed Indexed Annuity or provided investment advice to American Equity.

No Index Party has passed on the legality or suitability of, or the accuracy or adequacy of the descriptions and disclosures relating to, the Fixed Indexed Annuity, including those disclosures with respect to the Index. The Index Parties make no representation whatsoever, whether express or implied, as to the advisability of purchasing, selling or holding any product linked to the Index, including the Fixed Indexed Annuity, or the ability of the Index to meet its stated objectives, including meeting its target volatility. The Index Parties have no obligation to, and will not, take the needs of American Equity or any annuitant into consideration in determining, composing or calculating the Index. The

selection of the Index as a crediting option under a Fixed Indexed Annuity does not obligate American Equity or Société Générale to invest annuity payments in the components of the Index.

THE INDEX PARTIES MAKE NO REPRESENTATION OR WARRANTY WHATSOEVER, WHETHER EXPRESS OR IMPLIED, AND HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES (INCLUDING, WITHOUT LIMITATION, THOSE OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE), WITH RESPECT TO THE INDEX OR ANY DATA INCLUDED THEREIN OR RELATING THERETO, AND IN PARTICULAR DISCLAIM ANY GUARANTEE OR WARRANTY EITHER AS TO THE QUALITY, ACCURACY, TIMELINESS AND/OR COMPLETENESS OF THE INDEX OR ANY DATA INCLUDED THEREIN, THE RESULTS OBTAINED FROM THE USE OF THE INDEX AND/OR THE CALCULATION OR COMPOSITION OF THE INDEX, OR CALCULATIONS MADE WITH RESPECT TO ANY FIXED INDEXED ANNUITY AT ANY PARTICULAR TIME ON ANY PARTICULAR DATE OR OTHERWISE. THE INDEX PARTIES SHALL NOT BE LIABLE (WHETHER IN NEGLIGENCE OR OTHERWISE) TO ANY PERSON FOR ANY ERROR OR OMISSION IN THE INDEX OR IN THE CALCULATION OF THE INDEX, AND THE INDEX PARTIES ARE UNDER NO OBLIGATION TO ADVISE ANY PERSON OF ANY ERROR THEREIN, OR FOR ANY INTERRUPTION IN THE CALCULATION OF THE INDEX. NO INDEX PARTY SHALL HAVE ANY LIABILITY TO ANY PARTY FOR ANY ACT OR FAILURE TO ACT BY THE INDEX PARTIES IN CONNECTION WITH THE DETERMINATION, ADJUSTMENT OR MAINTENANCE OF THE INDEX. WITHOUT LIMITING THE FOREGOING, IN NO EVENT SHALL AN INDEX PARTY HAVE ANY LIABILITY FOR ANY DIRECT DAMAGES, LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

No Index Party is a fiduciary or agent of any purchaser, seller or holder of a Fixed Indexed Annuity. None of Société Générale, S&P, or any third party licensor shall have any liability with respect to the Fixed Indexed Annuity in which an interest crediting option is based on the Index, nor for any loss relating to the Fixed Indexed Annuity, whether arising directly or indirectly from the use of the Index, its methodology, any Société Générale Mark or otherwise. Obligations to make payments under the Fixed Indexed Annuities are solely the obligation of American Equity.

In calculating the performance of the Index, Société Générale deducts a maintenance fee of 0.50% per annum on the level of the Index, and fixed transaction and replication costs, each calculated and deducted on a daily basis. The transaction and replication costs cover, among other things, rebalancing and replication costs. The total amount of transaction and replication costs is not predictable and will depend on a number of factors, including the leverage of the Index, which may be as high as 200%, the performance of the indexes underlying the Index, market conditions and the changes in the market states, among other factors. The transaction and replication costs, which are increased by the Index's leverage, and the maintenance fee will reduce the potential positive change in the Index and increase the potential negative change in the Index. While the volatility control applied by the Index may result in less fluctuation in rates of return as compared to indices without volatility controls, it may also reduce the overall rate of return as compared to products not subject to volatility controls.

The rules of the Index may be amended by Credit Suisse International (the "Index Creator"). An amendment to the rules may result from, without limitation, a change to the construction or calculation rules for the Index or from the Index Creator determining that a change to the rules is required or desirable in order to update them or to address an error, omission or ambiguity. No assurance can be given that any such amendment would not affect parties to this document.

The end-of-day value of the Index is published subject to the provisions in the rules of the Index. Neither the Index Creator nor any of its affiliates is obliged to publish any information regarding the index other than as stipulated in the rules of these indices.

While volatility controls may result in less fluctuation in rates of return as compared to indices without volatility controls, they may also reduce the overall rate of return as compared to products not subject to volatility controls.
