

# Speed up the underwriting process for your clients

## What are the benefits of Accelerated Underwriting?

- ▶ **More satisfied clients** who get the coverage they need, without the inconvenience of labs or exams
- ▶ **Smarter process** that leverages digital health data (DHD) whenever possible
- ▶ **Easier access** with no separate AU checklists to complete or requests to submit

## How does it work?

- New applications are reviewed as soon as the Part B, prescription history, and MIB and MVR reports are received. In many cases, the applicant can be approved through AU in as little as 24 hours.<sup>1</sup>
- If immediate approval isn't possible because labs are required, we'll email the applicant requesting them to sync their health provider's information through the Human API portal. They have five days to complete the request, and once synced, the DHD will be sent electronically to our underwriters and reviewed within 48 hours.
- If the DHD provides all required information, including a physical and labs in the past 12 or 24 months (based on age/face amount requirements), a decision can be made.
- If DHD isn't sufficient, we'll post a requirement for labs and the case will continue through traditional underwriting.
- We'll keep you informed at every step. The field office contact will be notified when DHD is requested and will also be included on client communications. And your pending business report will be updated throughout the process as requirements change.
