

Tough Battle Right Team

It's About Surviving Cancer

People can search for statistics on their chances of being diagnosed with cancer in their lifetime and dwell on the negative. Let's focus on the positive.

Over the past 30 years, the 5-year survival rate for nearly all forms of cancer has increased significantly. And for some of the most common forms of cancer, the current 5-year survival rates are 90% or greater.

How You Can Help Your Clients

Most employer-based health insurance plans don't cover things like high deductibles, out-of-network care and any specialized treatment not covered by health insurance.

Mutual of Omaha's Cancer Insurance offers your clients a one-time payment after a cancer diagnosis - it's a benefit that helps them focus on getting well and not worrying about how they'll get money to pay for the costs.

Here are some of the ways your clients can use their lump-sum payment:

- Replacing lost income
- Paying for everyday expenses like groceries and bills
- Paying health insurance deductibles and copayments
- Hiring home health care or child care services
- Traveling to treatment facilities

Here's a chart that provides an overview of the features and benefits of Mutual of Omaha's Cancer Insurance.
