

# One client, multiple opportunities

Finding the next sale is always on the running to-do list. Life insurance sales that are traditionally one-and-done aren't always the right solution for your clients—or your business.

## The problem

### Your client may be:

- Underinsured or uninsured
- Planning for retirement needs
- Unsure what future tax rates will be

### ► Tools for the process

Establishing the need for life insurance can be straightforward with tools like our income protection guide and DIME worksheet. Here's the challenge: helping the client find the premium to fund their policy without impacting their current lifestyle. Use our cash flow worksheet to identify areas where premium could come from.

## Reviews for revenue

Use your annual reviews as a time to ensure the current death benefit split between the two policies is appropriate for your client's needs. If additional premium is available, talk with your client about a partial conversion from ADDvantage Term to Builder Plus 3. With each conversion, you can help increase your client's potential income later on in life! Under current company practices, if your clients convert their term within the first 5 years, they also have access to living benefits on the permanent policy.

Plus, conversions into an existing permanent product offer commission as if it is brand new premium!

1. Subject to the terms of the new policy.

2. Conversion period is either the whole length of the level term period or age 75 (70 for 30-year), whichever comes first. There are some restrictions based upon the age of the insured at policy issue, but the conversion period is never less than five years.

Builder Plus IUL® 3 (policy form series LS191) and ADDvantage® Term (policy form series LS174), or state variation including all applicable endorsements and riders, are issued by North American Company for Life and Health Insurance, Administrative Office, One Sammons Plaza, Sioux Falls, SD 57193. Products, features, riders, endorsement or issue ages may not be available in all jurisdictions. Restrictions or limitations may apply.

The net cost of a Fixed Interest Participating Policy Loan could be negative if the credits earned are less than the interest charged. The net cost of the loan could also be larger than under standard policy loans if the amount credited is less than the interest charged. In the extreme example, the amount credited could be zero and the net cost of the loan would equal the maximum interest rate charged less any guaranteed bonus. In brief, fixed interest rate loans have more uncertainty than standard policy loans in the interest rate credited.

Sammons Financial® is the marketing name for Sammons® Financial Group, Inc.'s member companies, including North American Company for Life and Health Insurance®.
