YOUR RETIREMENT. YOUR CHOICES.

When it comes to preparing for retirement, you want to ensure your hard-earned dollars will be there when you need them. With an AssetShield fixed index annuity, protect your money from losses due to index volatility and you choose how your money works for you to provide protected growth.

Choice of diversified indices

As a retirement insurance product, a fixed index annuity is not directly invested in any index and there is no risk associated with traditional direct stock ownership or market investment. The AssetShield offers protected growth potential through interest credited to your contract based, in part, on index increases. You choose where your money works for you through a selection of index options tracking global, domestic and market-sector indices.

S&P 500 Index SPX	Leading industry bench marks captures approximately 80% of market capitalization.
S&P Dividend Aristocrats Daily Risk Control 5% Excess Return SPXD5UE	Elite industry leaders with at least 25 years of consecutive growth.
BofA Destinations Index™ BOAFDST5	A multi-asset index developed in exclusive collaboration with Bank of America.
SG Global Sentiment Index SGIXSENT	Global multi-asset index using 6 cross asset capital market indicators tracking domestic, European and Asian markets.

Obligations to make payments under the Fixed Indexed Annuities are solely the obligation of American Equity. The selection of the Index as a crediting option under a Fixed Indexed Annuity does not obligate American Equity or Société Générale to invest annuity payments in the components of the Index. | In calculating the performance of the Index, Société Générale deducts a maintenance fee of 0.50% per annum on the level of the Index, and fixed transaction and replication costs, each calculated and deducted on a daily basis. The transaction and replication costs cover, among other things, rebalancing and replication costs. The total amount of transaction and replication costs is not predictable and will depend on a number of factors, including the leverage of the Index, which may be as high as 200%, the performance of the indexes underlying the Index, market conditions and the changes in the market states, among other factors. The transaction and replication costs, which are increased by the Index's leverage, and the maintenance fee will reduce the potential positive change in the Index and increase the potential negative change in the Index. While the volatility control applied by the Index may result in less fluctuation in rates of return as compared to indices without volatility controls, it may also reduce the overall rate of return as compared to products not subject to volatility controls. | The CS Tech Edge Index ("the Index") and "Credit Suisse", and any trademarks, service marks and logos related thereto are service marks of Credit Suisse Group AG, Credit Suisse International, or one of their affiliates (collectively, "Credit Suisse"). Credit Suisse has no relationship to American Equity Investment Life Insurance Company ("American Equity"), other than the licensing of the Index and its service marks for use in connection with a fixed indexed annuity offered by American Equity ("the Product") and is not a party to any transaction contemplated hereby. Credit Suisse shall not be liable for the results obtained by using, investing in, or trading the Product. Credit Suisse has not published or approved this document and accepts no responsibility for its contents or use.
