¹ The fixed index annuity in this hypothetical example uses the annual point-to-point index method based on changes in the BlackRock® Adaptive U.S. Equity 5% Index to calculate the indexed rate for each term. For purposes of this chart a 65% and 45% participation rate is applied for all terms in the period. Assuming \$100,000 initial premium and 10% bonus. Indexed interest is credited only on amounts held for the entire term. This example assumes no money is withdrawn from the annuity. Early withdrawal charges will apply if money is withdrawn during the early withdrawal charge period. See the disclosure document for the early withdrawal charge schedule.

Bonus available on 1st year premiums. Each year after the 1st contract year, you become vested in a percentage of the bonus, until 100% vested at the end of the 10th contract year. Vested amounts of the bonus are the amounts not forfeited as a result of an early withdrawal or surrender. Bonus, surrender charges, and vesting schedules may vary by state. See brochure and disclosure for details.

Participation rate is set at issue and subject to change. Past performance does not guarantee future results. 2018 is the year the IncomeShield 10 product became available.

Annuity Contract and Riders issued under form series ICC22 BASE-IDX-B, ICC22 IDX-11-10, ICC20 E-PTP-C, ICC20 E-PTP-PR, ICC20 E-MPTP-C, ICC16 R-MVA, ICC20 R-EBR, ICC20 R-LIBR-FCP, ICC20 R-LIBR-FSP, ICC20 R-LIBR-W-FSP, ICC20 R-LIBR-W-FCP, and state variations thereof. Availability may vary by state.

Possible interest credits for money allocated to an index-linked crediting strategy are based upon performance of the specific index; however, fixed index annuities are not an investment, but an insurance product, and do not directly invest in the stock market or the index itself.

Under current tax law, the Internal Revenue Code already provides tax-deferral to qualified money, so there is no additional tax benefit obtained by funding a qualified contract, such as an IRA, with an annuity; consider the other benefits provided by an annuity, such as lifetime income and a Death Benefit. Indexed annuities are not stock market investments and do not directly participate in any stock or equity investments. Market indices may not include dividends paid on the underlying stocks, and therefore may not reflect the total return of the underlying stocks; neither an index nor any market-indexed annuity is comparable to a direct investment in the equity markets.

Guarantees are based on the financial strength and claims paying ability of American Equity and are not guaranteed by any bank or insured by the FDIC.
