### Leveraging care annuities to increase income distributions for LTC

An aging population of retirees holding onto nonqualified, deferred annuity contracts often find themselves with no intention of turning on income distributions unless it's needed for emergencies or care-related expenses. After years of growth, the looming threat of taxation on gains alone can mean less money in their pockets when they need it most.

Imagine if you could show your clients a way to repurpose their existing annuity for one with built-in long-term care (LTC) benefits and avoid the tax implications in the process? Not only can gains in the contract be transferred tax-free, but also withdrawn later income tax-free for eligible LTC related expenses.

OneAmerica Financial™ offers a solution!

## Unlocking tax advantages under the Pension Protection Act (PPA)

The Pension Protection Act (PPA) of 2006 introduced significant changes and reforms surrounding the tax treatment of annuities to incentivize consumers to plan for future care needs. Its provisions allow for the tax-free exchange of an existing nonqualified annuity to a PPA-compliant annuity with LTC benefits.
