Next-Generation Volatility Control

S&P Dow Jones Indices, the leading provider of market indices for use in insurance products, has designed this index to measure exposure to the S&P 500[®] while applying a trend-following mechanism and intraday volatility control. This index is designed to maximize return potential, while also providing certainty on renewal rates.

Benefits of S&P 500[®] Dynamic Intraday TCA Index

- **Equity Only Design**
The index is only allocated to S&P 500[®] E-Mini Futures, without bonds or other asset classes.
- **15% Volatility Target**
It seeks to maintain a 15% volatility level, allowing for potentially higher exposure to the S&P 500[®].
- **Frequent Rebalancing**
The index is rebalanced up to 13 times per day.

Index 10-Year Lookback

— SS&P 500® Dynamic Intraday TCA Index

The index Launch Date is Aug 14, 2023. All information for an index prior to its Launch Date is hypothetical back-tested, not actual performance, based on the index methodology in effect on the Launch Date. Back-tested performance reflects application of an index methodology and selection of index constituents with the benefit of hindsight and knowledge of factors that may have positively affected its performance, cannot account for all financial risk that may affect results and may be considered to reflect survivor/look ahead bias. Actual returns may differ significantly from, and be lower than, back-tested returns. Past performance is not an indication or guarantee of future results.
