How does it work

An important part of the retirement income planning process is to organize thoughts around your cash flow needs and whether or not the spending is essential or non-essential.

A good place to start with this approach, is by running your finances through an income hierarchy chart. This can help map out the different expenses you might expect (as well as those you may not) throughout retirement. For each tier of the income hierarchy, itemize your list and ballpark your expenses.

STEP 1 | CHOOSE

Choose the expenses from the list you anticipate in your retirement. We've started a list of common retirement expenses that you can add on to here.

These are some common expenses of retirees. Circle those expenses that you would like to plan for, and add any expenses not included in the list.

How do you plan to spend your money?

STEP 2 | CATEGORIZE

Categorize everything you circled in step 1 into the income hierarchy tiers.

- 1 **At the bottom of the pyramid - Essential Expenses:**
Non-negotiable expenses like mortgage, utilities, insurance premiums, etc.
- 2 **In the lower-middle tier - Essential Lifestyle Expenses:**
Expenses you could do without, but are very important to your retirement lifestyle.

- 3 **In the upper-middle tier - Nice-to-Have Lifestyle Expenses:**
Spending that you would feel comfortable going without if you had to.
- 4 **Inside the top triangle - Wishes:**
If you all of the sudden had a windfall, what would you spend it on?

STEP 3 | COMBINE

Now that you've prioritized your expenses from "needs" to "wishes," work with your professional to combine your expected retirement expenses with your expected income sources.

Withdrawal charges may apply to an annuity. Interest earnings in an annuity are not taxed until withdrawn. Annuity withdrawals and distributions may be subject to income tax and, if withdrawals or distributions are taken prior to age 59½, a 10% federal penalty tax may apply.

Under current tax law, the Internal Revenue Code already provides tax-deferral to qualified money, so there is no additional tax benefit obtained by funding a qualified contract, such as an IRA, with an annuity; consider the other benefits provided by an annuity, such as lifetime income and a Death Benefit. Indexed annuities are not stock market investments and do not directly participate in any stock or equity investments. Market indices may not include dividends paid on the underlying stocks, and therefore may not reflect the total return of the underlying stocks; neither an index nor any market-indexed annuity is comparable to a direct investment in the equity markets.
